Dear parents / carers,

GL Ready is a computer-based system for the early identification of learning difficulties, including traits of dyslexia, between the ages of 4 to 15 years. It is easy for the children to complete, taking only 15 minutes on a tablet or laptop. The activity is split into 3 sub-tests to identify difficulties with phonological processing, auditory working memory, phonic decoding skills and memory skills.

All new children to our school, alongside F2 (Red and Green class) will have the opportunity to complete the test, which is like completing a fun and interactive game on a device. The games have been historically very popular amongst the children. A familiar adult will support your child on a 1:1 or small group basis within the next half term.

Should any child be identified as having difficulties with a particular area of their learning, teachers will be in contact with parents and carers to discuss any strategies or resources which need putting into place. A copy of the report will be sent home.

The GL Ready system is highly recommended amongst schools and is a relaxed, interactive way of assessing children's needs. Should you have any questions about these, please email the school office or speak to your child's class teacher.

Yours sincerely,

*D. Bradley*
